

TYPO3.Flow - Bug # 31696

Status:	Resolved	Priority:	Should have
Author:	Ferdinand Kuhl	Category:	Persistence
Created:	2011-11-09	Assigned To:	Sebastian Kurfuerst
Updated:	2011-11-12	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:			
Affected Flow version:	FLOW3 1.0.0		
Subject:	TYPO3\FLOW3\Persistence\Doctrine\Query __sleep __wakeup cycle defect		
Description	<p>If you pass a query result to an ajax-widget and execute it there, it substantially changes from the original query.</p> <p>If you used complex "where" - criterions which involves joins, the parameters at the ajax-side leads to an error, because the joins will vanish during this process.</p>

Revision c131afab - 2011-11-10 11:51 - Ferdinand Kuhl

[BUGFIX] Fix Persistence\Doctrine\Query serialization cycle

If you assign a QueryResult to a ViewHelper and later on use \$result->getQuery(), this query is not executable any more, if you used complex "where"-clauses involving joins, as these joins are not reapplied to the object during the __wakeup() call.

This patch ensures the query being callable like the original one after __wakeup() by saving all joins in array and reapplies them after wakeup. A functional test is included.
