TYPO3 Version:	4.5
PHP Version:	5.3
Complexity:	no-brainer
Is Regression:	
Sprint Focus:	
Subject:	Live search does not find all tables

Description
The live search in the TYPO3 backend does not find content in all the expected tables, because it forgets to load the full TCA. Thus looping on column names does nothing. NOTE: I'll open a separate issue for 4.6+, because the problem is compound there by having forgotten to apply the new search properties of the TCA (see #26829) to the live search.

[BUGFIX] Live search does not find all tables

To find anything in a given table, the live search loops on all that

table's columns. However it forgets to load the full TCA beforehand

and thus fails to find anything in tables for which it is not

fully loaded yet.

Patch set 1 of change Ief94a26d5ba9ead77930835e61ebae3b01980368 has been pushed to the review server.

It is available at http://review.typo3.org/6631

#2 - 2011-11-11 16:12 - Francois Suter

Steps to reproduce:

1. create a record for any table that's not fully loaded by default (let's assume you take the "examples" extension and create a haiku record
2. enter text "xyz" in whatever passes for a title for that record type
3. save and close
4. type "xyz" in the live search and observe that your record does not show up
5. click "Show All" and observe that your shows up in normal BE search
6. apply the patch
7. search again for "xyz" in live search => your record should be visible now (provided it's among the first 5 results)
