Is Regression:					
Sprint Focus:					
Subject:	Live search does not implement search properties				
Description					
<p>With #26829 new TCA properties were added to improve the efficiency of the backend search. However these properties were not applied to the live search, hence both searches produce different results, which is not the expected behavior.</p> <p>Furthermore the live search must load the full TCA of any table it searches in (as necessary) in order to be able to find anything at all for tables for which the full TCA is not yet loaded (see #31760).</p>

Revision cf878c15 - 2012-02-07 08:21 - Francois Suter

[BUGFIX] Live search must implement search properties

Implement the new TCA properties introduced in TYPO3 4.5 (#26829) in the live search, so that it produces the same results as the traditional BE search.

History

#1 - 2011-11-22 15:15 - Xavier Perseguers

- Target version changed from 4.6.1 to 4.6.2

#2 - 2012-01-10 14:03 - Stefan Neufeind

I think this is related to what I experience with 4.6.3 (and tt_news 3.1.0). We added

```
$TCA['tt_news']['ctrl']['searchFields'] = 'title';
```

to typo3conf/extTables.php and from there on it was possible to search inside the titles of a news-entry using the search-functionality below a page. (Using the introduction-package you may search for "t3uxw".)

However the live search/quick search still doesn't contain those tt_news-entries.

Funny enough: When clicking the "Show all"-button below the live-search you get them ... since then the normal search-functionality is used.

#3 - 2012-01-10 14:13 - Francois Suter

Yes exactly.

I still mean to work on this some day, but it's not my top priority for now. Of course anyone should feel free to pick it up ;-)
