TYPO3.Fluid - Feature # 31765

Status:	Resolved	**Priority:**	Should have
Author:	Carsten Bleicker	**Category:**	Widgets
Created:	2011-11-11	**Assigned To:**	Bastian Waidelich
Updated:	2014-07-11	**Due date:**	
Has patch:	No		
Subject:	Forward to Action of widgetController		

Description

widget controller has 2 actions:
1. indexAction
2. createAction

after createAction i want to forwad to the indexAction again.
but doesnt work. getting a white page withoud any result by using $this->forward('index).
any ideas to do something like a forward inside of the widget controller?

thanks
carsten

[FEATURE] Support for redirects within widgets

Redirects and forwards did not work from within widget controllers
because there was no internal dispatch-loop.

This change implements support for redirects and forwards.
Besides this adds a controller check that throws an
exception when trying to redirect to a different controller
than the one associated with the widget ViewHelper.

This does work for me in the current master. Tried it in the indexAction of a widget controller as well as in an Ajax Action called by an ajax controller.

#6 - 2012-04-24 12:33 - CPS-IT GmbH

Sorry, just read that you try to reforward to your index action. So there is a loop calling index and create actions alternately. This can't work. I think you reach dispatchLoopCount in TYPO3\FLOW3\Mvc\Dispatcher which executes an Exception.
