

Core - Bug # 31978

Status:	Resolved	Priority:	Should have
Author:	Georg Ringer	Category:	FormEngine aka TCEforms
Created:	2011-11-22	Assigned To:	
Updated:	2012-09-30	Due date:	
TYPO3 Version:	4.7		
PHP Version:	5.3		
Complexity:	easy		
Is Regression:			
Sprint Focus:			
Subject:	tcaTree: PHP Warning: Missing argument 2 for extDirect_DataProvider_BackendUserSettings::addToList()		
Description			
<p>the tcmtree throws an error every time it is called. I am not into ExtJS and neither into the tcaTree itself but IMO those information should be enough to fix it.</p>			
<p>How to test</p> <p>-----</p> <p>Install EXT:news, create at least one category and call either the category record or the plugin - both got a tca tree implemented</p>			
<p>Information from debugging</p> <p>-----</p> <p>The error comes from class t3lib_TCEforms_Tree which got an inline JS</p> <pre>expandnode: function(node) { top.TYPO3.BackendUserSettings.ExtDirect.addToList("tcaTrees." + this.uclid, node.attributes.uid); }</pre>			
<p>Problem is that node.attributes.uid is undefined. This happens with the root node</p>			
<p>Using this code to debug</p> <pre>if (node.attributes.uid) { top.TYPO3.BackendUserSettings.ExtDirect.addToList("tcaTrees." + this.uclid, node.attributes.uid); } else { alert(node); }</pre>			
<p>shows 2 alert boxes with:</p> <p>[Node xnode-27]</p> <p>[Node root]</p>			
<p>Possible solutions=====</p> <p>As already stated, I no nothing about ExtJS but there are IMO 2 possible solutions:</p> <p>1) Use an if clause "if (node.attributes.uid) {"</p>			

2) Maybe it is even more simple as IMO it should be node.attributes.id as t3lib_tree_pagetree_DataProvider also uses e.g. "\$node->setId('root');" The maybe wrong value is also used in TYPO3.Components.Tree.TcaCheckChangeHandler inside tree.js
