

TYPO3 Flow Base Distribution - Bug # 32014

Status:	Resolved	Priority:	Must have
Author:	Karsten Dambekalns	Category:	- Testing -
Created:	2011-11-23	Assigned To:	Karsten Dambekalns
Updated:	2011-12-22	Due date:	
Affected Flow version: FLOW3 1.0.1			
Subject:	Some unit tests break when run with PHPUnit 3.6		
Description			
<p>When using PHPUnit 3.6 to run the unit tests, some tests fail. Partly this is caused by new restrictions in PHPUnit (one must no longer expect the generic Exception class) partly the more strict behavior of PHPUnit uncovers real bugs in the tests. Affected are tests in FLOW3 and Fluid.</p>
