

TYPO3.Fluid - Bug # 32451

Status:	Resolved	Priority:	Should have
Author:	Sebastian Kurfuerst	Category:	Widgets
Created:	2011-12-12	Assigned To:	Sebastian Kurfuerst
Updated:	2011-12-19	Due date:	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	Adjust Ajax Widgets to new Bootstrap		
Description			
<p>The new FLOW3 Bootstrap (#32333) implements new request handlers. Now, Fluid needs to be adjusted to the new request handlers. however, there is one problem: The Fluid request handler determines if it can be used depending on whether a certain GET variable is set. For that, it uses the TYPO3\FLOW3\Utility\Environment; which is however not yet initialized when canHandleRequest is called.</p> <p>A workaround would be to use \$_GET directly; but can we find a clean solution to this?</p>

[BUGFIX] (Widget): Adjust Ajax Widgets to rewritten Bootstrap

As the concept of Request Handlers has been updated and extended, we need to adjust the WidgetRequestHandler accordingly.

This bugfix is testable with the Viewhelpertest package, using the manual test "Widgets: AJAX widget context is reset correctly".
