<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Add a cli-command to show and explore the current configuration		
<b>Description</b>	<p>Since the configuration of FLOW3 is complex and comes from many different files it should be possible to show the currently active framework-configuration for better understanding an debugging.</p> <p>I suggest to implement a "configuration" cli-command for that purpose. At first the command-controller will only have a showCommand method but later on it can be extended to evaluate and to write the configuration.</p>		

### Associated revisions

#### Revision ac7f4bd9 - 2011-12-23 18:14 - Martin Ficzel

[FEATURE] (CLI): Add configuration:show command for debugging

Adds the cli command "configuration:show" with the options --type and --path.

The patch adds the method getAvailableConfigurationTypes to the configurationManager which is used by the cli-command.
