TYPO3.Neos - Bug # 32492

Status:	Resolved	**Priority:**	Must have
Author:	Markus Goldbeck	**Category:**	
Created:	2011-12-13	**Assigned To:**	
Updated:	2011-12-15	**Due date:**	
Subject:	Creating an admin with ./flow3 setup:createadministrator		

Description

Currently it is not possible to create an admin.

    ./flow3 setup:createadministrator admin password
    Created account "admin".
    Uncaught Exception
      An instance of "TYPO3\TYPO3\Domain\Model\User" failed to pass validation
      with 1 error(s):
      name:
      This property is required.

      More Information
      Exception code   #1322585164
      File
    /Applications/MAMP/htdocs/PhoenixCore/Data/Temporary/Development/Cache/Code/FLOW3_Object_Classes/TYPO3_FLOW3_Persister
    3_Persistence_Doctrine_PersistenceManager_Original.php line 124
      Exception reference #201112131023183a7577

After deleting the Annotation * @FLOW3\Validate(type="NotEmpty") in /TYPO3.Party/Classes/Domain/Model/Person.php it worked.

So it seems something to do with Validation

[BUGFIX] Add first name and last name to setup command

Persons are validated to have a name, that should be reflected
in the setup command controller. The command has now 4 required
parameters. identifier, password, firstName and lastName.

Fixes: #32492
