

FluidBackporter - Bug # 3250

Status:	New	Priority:	Should have
Author:	Sebastian Fischer	Category:	
Created:	2009-05-08	Assigned To:	
Updated:	2010-10-20	Due date:	
Subject:	Translation of form.submit		
Description			
<p>Currently its impossible to translate form.submit</p> <pre><f:form.submit><f:translate key="lang_submit"/></f:form.submit></pre> <p>This construct doesn't work. And in viewhelptest is no matching example given. And no <code>\$this->renderChildren();</code> is given in SubmitViewHelper.php</p>			

History

#1 - 2009-05-08 19:06 - Sebastian Fischer

```
public function render($name = "", $value = "") {
    $this->tag->addAttribute('type', 'submit');
    if ($name !== "") {
        $this->tag->addAttribute('name', $name);
    }
    $content = $this->renderChildren();
    if ($content !== "") {
        $value = $content;
    }
    if ($value !== "") {
        $this->tag->addAttribute('value', $value);
    }

    return $this->tag->render();
}
```

Here the `$value` is set with result of `renderChildren` and now translation works. If `renderChildren` is empty the default value that is still possible isn't overwritten.
