[BUGFIX] Missing renames of addClass and removeClass

With ExtJS4 the function names of addClass and removeClass have
been renamed to addCls and removeCls at all places to have only
one name for the same function throughout the Framework.

Not all occurences within Core have been overworked within the
ExtJS 4 Migration. This is tackled now.

Note: ext:form, ext:workspaces and ext:em are excluded as there
are special Tasks for these extensions.
