[TASK] Add ExtJS3 Compatibility Layer Extension

Until all Backend-Modules are migrated to ExtJS4 we need to make them available via ExtJS3. Thanks to Iframes this is possible.

This sysext ships all ExtJS 3 Code which had been in place before the migration and adds an LoaderClass, which hooks into PageRenderer to exchange the Library if requested.

Besides that, extjs3\_compat is defined as required extension to be automatically available.

This whole package will be reverted again until the final 4.7 release.
