PHP Version:			
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git master		
Subject:	Files unit tests create but don't remove a lot of temporary files		
Description			
<p>The tests in TYPO3\FLOW3\Tests\Unit\Utility\Files generate various temporary files through PHP's tempnam() function.</p> <p>However, these files are never removed again, which led to our CI server having > 400,000 files in /tmp</p> <p>The test case should use a subdirectory in \$TMP and have a teardown method which removes that subdirectory recursively.</p>
