| Complexity: | | | |
| Subject: | Support Conjunction and Disjunction Composite validators | | |
| Description | | | |
| <p>The ChainValidator should be replaced by two new validators: the ConjunctionValidator and the DisjunctionValidator. Both new validators are composite validators (consisting of a number of sub validators). The ConjunctionValidator combines validation results with AND, while the DisjunctionValidator uses OR.</p> | | | |

History

#1 - 2009-05-12 15:28 - Robert Lemke

- Assigned To set to Christopher Hlubek
- Target version changed from 283 to 1.0 alpha 1

#2 - 2009-05-14 18:45 - Christopher Hlubek

- Status changed from New to Resolved
- % Done changed from 0 to 100
