TYPO3.Party - Bug # 32813

Status:	Closed	**Priority:**	Should have
Author:	Jonny	**Category:**	
Created:	2011-12-22	**Assigned To:**	Karsten Dambekalns
Updated:	2015-03-16	**Due date:**	

Affected Flow version:	FLOW3 1.0.2
Subject:	Fatal error in Persistance Manager

Description

My Model has an OneToOne relation to a party Person Model of the Party Package.

```
/**
 * The Person of this profile
 *
 * @var \TYPO3\Party\Domain\Model\Person
 * @ORM\OneToOne(cascade={"all"})
 */
protected $person;
```

On altering the electronicAddress by setting the approved to TRUE, the persistance manager throws a Fatal Error:

```
PHP Fatal error:  Call to a member function getClassName() on a non-object in [...]PersistenceManager_Original.php on line
106
->
$validator = $this->validatorResolver->getBaseValidatorConjunction($classSchema->getClassName());
```

I fixed this quick and dirty by inserting this line :

```
if ($classSchema === NULL) return;
```

before the getClassName on $classSchema.

btw: im working with version 1.0.2 (couldn't find it in the dropdown list)

History

#1 - 2012-01-03 10:58 - Karsten Dambekalns

- Affected Flow version changed from FLOW3 1.0.1 to FLOW3 1.0.2

#2 - 2012-03-07 22:05 - Karsten Dambekalns

- Status changed from New to Accepted

- Assigned To set to Karsten Dambekalns

#3 - 2012-05-16 16:59 - Karsten Dambekalns

- Target version set to 1.0.5

#4 - 2012-06-05 21:20 - Karsten Dambekalns

- Target version changed from 1.0.5 to 1.1 RC1

#5 - 2012-06-26 11:55 - Karsten Dambekalns

- Status changed from Accepted to Closed

I built some PoC code and all worked as expected using master and 1.1.0-dev. If this is still an issue for you, feel free to reopen and add some code that shows the error. Thanks!

#6 - 2015-03-16 17:33 - Christian Müller

- Target version deleted (1.1 RC1)
