**Description**

So, Sproutcore 2 has forked and left the Sproutcore project. It is now known as Ember.js.

At some point, it should be updated in TYPO3, and references to sproutcore should instead say Ember.js.

About the name change:

Just thought I'd stick this in the queue for whoever ends up doing it at some point. I have no idea if when this should be done, I just figure it will, at some point, be done.
