Fluid:

- Added Inline ViewHelper Syntax (resolves #3295)

History

#1 - 2009-05-15 22:24 - Sebastian Kurfuerst

Reason why we do shorthand syntax to call viewhelpers:

This will be allowed: {f:link("Hello {f:format.date()} world" action="greet")}

Things with multiple lines will not be allowed (we want to enforce people to use XML-based syntax in this case:{f:link("Hello

{f:for}
 world"
action="greet")}

The unnamed parameter, if it exists, has to be the first one.{f:link("Hello Guys" action="greet")}

We accept the following line, though it is really ugly as hell
<!-- Bad, but allowed --> {f:for("{singlePost}" each="{post}" as="singlePost")}

We call this syntax
INLINE NOTATION!!!!
