

TYPO3.Fluid - Task # 3311

Status:	Closed	Priority:	Should have
Author:	Bastian Waidelich	Category:	
Created:	2009-05-15	Assigned To:	
Updated:	2011-05-05	Due date:	
Has patch:			
Subject:	Refactor Unit tests		
Description			
One unit test should only depend on one concrete class. All dependencies must be mocked or put in fixtures to avoid sideeffects and to reduce the adaption work that is needed when changing class/method signatures.			

Associated revisions

Revision d8b9309e - 2009-05-15 13:19 - Bastian Waidelich

Fluid: * AbstractViewHelper: there is no default data type of "Text" set anymore for method parameters to be able to throw a meaningful exception if method argument annotations could not be parsed (e.g. due to PHP optimizers that stripped off the docComments). This relates to #3309. * Started to refactor unit tests in order to reduce dependencies. This relates to #3311. * Replaced public properties by setter methods in core classes.
