

TYPO3.Flow - Bug # 33158

Status:	Closed	Priority:	Could have
Author:	Giovanni Romero Pérez	Category:	Core
Created:	2012-01-13	Assigned To:	Rens Admiraal
Updated:	2012-06-28	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: FLOW3 1.0.2			
Subject:	Problems setting PHP binary path on Windows		
Description			
Windows Server 2008 R2 SP1 Apache 2.2 PHP 5 I still set FLOW3.core.phpBinaryPathAndFilename in Configuration/Settings.yaml			
I tries with:			
core: phpBinaryPathAndFilename: 'C:\www\bin\php\php.exe'			
and			
core: phpBinaryPathAndFilename: 'C:/www/bin/php/php.exe'			
It seems like the PHP binary "C:\php\php" cannot be executed by FLOW3. Set the correct path to the PHP executable in Configuration/Settings.yaml, setting FLOW3.core.phpBinaryPathAndFilename.			
3 TYPO3\FLOW3\Core\Bootstrap::initializeForRuntime()			
2 TYPO3\FLOW3\Core\Bootstrap::handleWebRequest()			
1 TYPO3\FLOW3\Core\Bootstrap::run()			
Please include more helpful information!

The flow3.bat also has a path to php.exe. So you should also change this to your local php path to make this work.

#2 - 2012-03-07 18:41 - Karsten Dambekalns

- Subject changed from *TYPO3\FLOW3\Exception thrown in file Bootstrap.php* to *Problems setting PHP binary path on Windows*
- Category changed from *Error Handler Report* - to *Core*
- Status changed from *New* to *Needs Feedback*
- Assigned To set to *Rens Admiraal*
- Priority changed from *-- undefined --* to *Could have*

Rens, could you check this?

#3 - 2012-03-07 23:20 - Rens Admiraal

Sure, will have a look this week

#4 - 2012-03-09 15:48 - Rens Admiraal

Giovanni: are you sure you've no indent errors in your Settings.yaml? I've a 2008 IIS environment using:

```
TYPO3:
FLOW3:
  core:
    phpBinaryPathAndFilename: 'C:/map2/php.exe'
```

This works fine for me, and let's me switch between PHP versions without any problem.

#5 - 2012-03-09 16:03 - Adrian Förder

just as a feedback; in my case also the even worse variation with spaces and backward slashes **works**:

```
TYPO3:
FLOW3:
  core:
    phpBinaryPathAndFilename: 'C:\Program Files\Zend\ZendServer\bin\php.exe'
```

caution Rens: now **you** have an indentation error in your sample, core: is only preceded by one space. So beware when copying this :)

#7 - 2012-03-09 16:42 - Rens Admiraal

thanks for noticing ;-)) and fixed the example... :)

#8 - 2012-06-28 10:59 - Rens Admiraal

Problem can't be reproduced, probably a configuration issue. Giovanni: if you still experience this problem, can you let me know? Then we can see if we have to reopen this issue
