TYPO3.Flow - Bug # 33191

Status:	Rejected	**Priority:**	Should have
Author:	Pascal Walter	**Category:**	Property
Created:	2012-01-14	**Assigned To:**	
Updated:	2012-03-14	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: FLOW3 1.0.2			
Subject:	TypeConverter from string to array		
Description			

I discovered this bug by using a <f:form.select name="items" /> in a form. In case the user doesn't select anything, the array items is empty. But the normal Property TypeConverter from FLOW3 just convertes arrays to arrays. So I forked it and supported string to array conversion, which is pretty easy. I attached my customized TypeConverter how fits me needs. But I dont think its best practice or best coding style.

Maybe you guys come up with a better solution for that.

- Status changed from New to Rejected

There are other ways to work with your use case. If we create a string to array converter it should actually try to convert something, like serialized arrays.
