TYPO3.Flow - Bug # 332

Status:	Rejected	**Priority:**	Should have
Author:	Malte Jansen	**Category:**	Error
Created:	2008-02-19	**Assigned To:**	Robert Lemke
Updated:	2010-10-20	**Due date:**	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Error screen just displays the beginning of an absolute path		
Description			
A relative path would be more useful, because you normally know, where you are running you installation. See Screenshot...			

History

- Status changed from New to Rejected

- Assigned To set to Robert Lemke

Your screenshot doesn't show an error message but an exception backtrace. The path you see there is just an argument to a method - the exception handler can't know if that is a path or not. And even if it would be quite confusing for debugging if the exception handler modified the argument values in the backtrace.

Sorry wrong word yesterday evening..

What about just changing the HTML-output or don't croping it. This should just be a View adjustment or am I wrong?

#3 - 2008-02-20 09:47 - Malte Jansen

What about just adding the dots at the beginning instead of the end? The filename is unique and includes normally the path, so just know where it's located.
