TYPO3.Fluid - Bug # 33421

Status:	Resolved	**Priority:**	Should have
Author:	Bastian Waidelich	**Category:**	ViewHelpers
Created:	2012-01-24	**Assigned To:**	Bastian Waidelich
Updated:	2012-01-26	**Due date:**	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	AbstractFormFieldViewHelper does not resolve property path		

Description

When binding a form field to a property like

    <f:form.textfield property="some.property" />

The resulting element name attribute should be:

    [...] name="formPrefix[formObjectName][some]property"

This works as long as a form object name is specified (<f:form objectName="xyz" />) but it fails to resolve the property path if not:

    [...] name="formPrefix[some.property]"

Revision 483a866c - 2012-01-24 19:35 - Bastian Waidelich

[BUGFIX] FormFieldViewHelpers do not resolve property path

When binding a form to an object the form elements fail to
correctly resolve the property path if no "formObjectName" is
specified.
