Updated:	2012-03-01	Due date:	
PHP Version:			
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git master		
Subject:	Missing function visibility declarations		
Description			
<p>I found a missing visibility declaration in \TYPO3\FLOW3\MVC\Web\Routing\Route, and thought I'd search to see if there were more.. With this "grep -rin \$'\t'function *" in the FLOW3 package folder I found 6 occurrences..</p> <pre>TYPO3.FLOW3/Classes/Cache/Frontend/FrontendInterface.php:109: function flush(); TYPO3.FLOW3/Classes/MVC/Web/Routing/Route.php:472: function extractInternalArguments(array &\$arguments) { TYPO3.FLOW3/Classes/Persistence/Doctrine/Mapping/Driver/Flow3AnnotationDriver.php:673: function (\$className) { TYPO3.FLOW3/Classes/Persistence/Doctrine/Service.php:164: function (\$message) use (\$that) { TYPO3.FLOW3/Classes/Utility/Environment.php:505: function(&\$value, \$key) { TYPO3.FLOW3/Tests/Functional/AOP/Fixtures/Name.php:27: function __construct(\$name) {</pre> <p>The Route function "extractInternalArguments" should be protected, as discussed with Bastian, since it's would require to construct a new route and it's not part of the api (@api) so I could likely change. It's stems from this commit: https://review.typo3.org/#change,5779</p> <p>I haven't looked for further details about the other occurrences..</p>

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns
- Target version set to 1.1

FrontendInterface should be public, Route protected (as noted above), the Name fixture public. The others are anonymous function / closures, thus no

visibility needed.
