

## TYPO3.Flow - Feature # 33469

Task # 36800 (Accepted): Streamline Resource object API

<b>Status:</b>	Rejected	<b>Priority:</b>	Should have
<b>Author:</b>	Bastian Waidelich	<b>Category:</b>	Resource
<b>Created:</b>	2012-01-26	<b>Assigned To:</b>	
<b>Updated:</b>	2013-08-02	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Support for temporary Resources		
<b>Description</b>			
Currently all resources need a Database, because the resource manager uses it in order to store resource pointers. It should be possible to work with resources without having to use the (doctrine) persistence layer.

### History

**#1 - 2012-05-03 10:51 - Robert Lemke**

- Parent task set to #36800

**#2 - 2013-08-02 17:03 - Robert Lemke**

- Status changed from New to Rejected

With what we currently call "Resource" - that is, managed assets which are stored somewhere and published somewhere (else) - I don't see a way to work without a database or at least a file based database like sqlite.
