PHP Version:	5.3		
Has patch:	No		
Complexity:	medium		
Subject:	Append query arguments from RoutePart handlers		
Description			

It would be nice if we could append query arguments from routepart handlers, e.g. a appendArguments method, where it would be possible to add other query parameters which aren't a part of the returned path. In Phoenix we need this for modules since the route part handler for modules creates a query string, which causes this problem: #33519. It would be better if it could just add some arguments, and all the logic about creating the querystring, removing empty values, converting objects to identifiers etc.

- Status changed from New to Needs Feedback

Do we still need this for Neos?

I'm still a bit unsure about this approach..

#3 - 2012-10-31 19:02 - Aske Ertmann

I'd a missing feature for creating links inside modules at the moment. But since we've fixed recursive namespaced arguments with https://review.typo3.org/#/c/15261/, there are some stuff broking with the current custom module route part handlers, which I need to look into. And I would suggest not to do anything about this until I have found a new solution for the module route part handlers..

Ok, I put this on hold for now.

#5 - 2013-08-26 11:04 - Bastian Waidelich

- Status changed from On Hold to Rejected

I close this for now (> 9 month on hold). Feel free to reopen if we need this
