TYPO3.Fluid - Bug # 33569

Status:	Resolved	**Priority:**	Should have
Author:	Bastian Waidelich	**Category:**	ViewHelpers
Created:	2012-01-31	**Assigned To:**	Bastian Waidelich
Updated:	2012-02-01	**Due date:**	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	AbstractFormFieldViewHelper always converts entities to identities		
Description			

AbstractFormFieldViewHelper::getValue() currently always tries to convert objects by calling
PersistenceManager::getIdentifierByObject(). This makes it impossible for custom ViewHelpers to access the unmodified value.

[BUGFIX] AbstractFormFieldViewHelper always converts entities

AbstractFormFieldViewHelper::getValue() currently always tries
to convert objects to identities by calling
PersistenceManager::getIdentifierByObject().
This makes it impossible for custom ViewHelpers to access the
unmodified value that was previously submitted (or bound to the
form field view helper).

This change introduces an argument $convertObjects that allows
experienced developers to disable this behavior in custom
view helpers.
