FLOW3:

- included instructions for installing PHP 5.3 to the manual, refs #3379, refs #3380, refs #3381

History

#1 - 2009-05-19 18:36 - Thomas Hempel

Does it make sense to write installation instructions for OS X for normal users? I think it's very unlikely, that a person you want's to try out FLOW3 will use OS X for that. At least if this person reads the instructions.

Maybe this should be an how-to for Developers who want to have a development environment on OS X.

#2 - 2009-05-29 16:18 - Karsten Dambekalns

- Status changed from Accepted to Resolved
- Assigned To changed from Thomas Hempel to Karsten Dambekalns
- % Done changed from 0 to 100

I think the manual has some semi-decent installation instructions now, even including how to install PHP 5.3 (thanks Thomas).
