

TYPO3.Flow - Bug # 33883

Status:	Resolved	Priority:	Should have
Author:	Kira Backes	Category:	Persistence
Created:	2012-02-13	Assigned To:	Karsten Dambekalns
Updated:	2012-05-03	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	Repositories must be singleton, but no checks are done on this		
Description			
<p>I have models with injected repositories and due to some change in the last 2 weeks in master I can no longer use FLOW3, since the following error comes up:</p> <p>Undefined method 'getDefaultOrderings'. The method name must start with either findBy or findOneBy!</p> <p>This was tracable to the fact that \TYPO3\FLOW3\Reflection\ObjectAccess::isPropertyGettable checks for is_callable, which returns true for every method in Repositories (due to the magic __call method) which in turn causes \TYPO3\FLOW3\Validation\Validator\GenericObjectValidator::getPropertyValue to not use the direct property access, even though it would be needed.</p>

Revision 5e342192 - 2012-04-30 16:10 - Karsten Dambekalns

[BUGFIX] Check that repositories are of singleton scope

Repositories must be singletons, otherwise strange things and seemingly weird errors happen. This change adds a check for the scope, so that developers at least know what is wrong.

Fixes: #33883

Releases: 1.1

Revision cfbc8fa0 - 2012-05-03 10:13 - Sebastian Kurfuerst

[BUGFIX] (Persistence): Fix failing RepositoryTest

The test fails since lc3782452e941574dd85068535092877efd7ca190 which forgot to adjust the Unit Tests.

History

#1 - 2012-02-14 10:17 - Kira Backes

It is "fixable" by setting the scope of the repositories to Singleton

#2 - 2012-02-16 11:27 - Karsten Dambekalns

- *Subject changed from ObjectValidation fails, partially unusable system to Repositories must be singleton, but no checks are done on this*
- *Category set to Persistence*
- *Status changed from New to Accepted*
- *Assigned To set to Karsten Dambekalns*
- *Priority changed from Must have to Should have*
- *Target version set to 1.1*

Well, repositories must be singleton, otherwise I don't even want to imagine what happens...

I changed the bug title accordingly.

#3 - 2012-04-30 16:10 - Gerrit Code Review

- *Status changed from Accepted to Under Review*

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/10899>

#4 - 2012-05-03 14:40 - Karsten Dambekalns

- *Status changed from Under Review to Resolved*
- *% Done changed from 0 to 100*

Applied in changeset commit:5e342192819640b75bb54f86873622e537af810b.
