<b>Complexity:</b>			
<b>Subject:</b>	Make quantity optional when using single numeric arguments in translations		
<b>Description</b>			
<p>When using plural forms, the quantity to be used for finding the correct plural form has to be given explicitly. This is cumbersome when using a single numeric argument, as it means to pass the same value twice. Here is an example:</p> <pre>&lt;f:translate arguments="{0: post.numberOfComments}" quantity="{post.numberOfComments}"&gt;</pre> <p>It would be nice if for single numeric arguments the quantity could be determined automatically:</p> <pre>&lt;f:translate arguments="{0: post.numberOfComments}"&gt;</pre>

[FEATURE] Makes quantity optional in translation methods

When using plural forms, the quantity to be used for finding the correct plural form had to be given explicitly. This was cumbersome when using a single numeric argument, as it meant to pass the same value twice.

With this change the quantity is determined automatically if a single numeric argument is given to `translateById()` or `translateByOriginalLabel()` in `Translator`.

Also fixes a few I18n unit tests along the way.
