FYI this is (kind of) how you can use those to output localized validation messages:

```
1 <f:form.validationResults for="{property}">
2   <f:for each="{validationResults.errors}" as="error">
3     {error -> f:translate(key: error.code, arguments: error.arguments, package: 'TYPO3.FLOW3', source: 'ValidationErrors')}
4   </f:for>
5 </f:form.validationResults>
```
