TYPO3 Flow Base Distribution - Task # 33975

Status:	Resolved	**Priority:**	Should have
Author:	Karsten Dambekalns	**Category:**	
Created:	2012-02-16	**Assigned To:**	Karsten Dambekalns
Updated:	2012-02-17	**Due date:**	
Subject:	Tweak existing XLIFF files according to translation team feedback		
Description			

The XLIFF file miss xml:space="preserve", a trans-unit must look like:

    <trans-unit id="mlang_labels_tablabel" xml:space="preserve">
      <source>Webpages and databasecontent</source>
    </trans-unit>

Each trans unit must have the xml:space="preserve" attribute, this is needed by Pootle to avoid some weird problem.

An other point, please add product-name="package.name" to the file element, we use it for v4 core, and it's sometime useful to have this information in the XLIFF.
