

TYPO3.Flow - Bug # 3404

Status:	Resolved	Priority:	Should have
Author:	Sebastian Kurfuerst	Category:	MVC
Created:	2009-05-21	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Refactor ControllerContext to be built only before passing it to the View		
Description			
<p><code>\$this->controllerContext</code> should not be available in the Controller, but just be passed on to the View.</p> <p>There is one question remaining: Should the URIHelper / URIBuilder get this whole object, or just the Request object?</p> <p>Greets, Sebastian</p>

Revision 7030ab49 - 2009-05-23 18:51 - Bastian Waidelich

FLOW3:

- Removed FLOW3\Utility\GenericCollection from repository, it's currently not needed. Resolves #3400
- Moved method `setArgumentsFromRawRequestData()` from Router to RequestBuilder. Resolves #3368
- Renamed URIHelper to URIBuilder. Removed Classes HelperInterface, AbstractHelper and InvalidViewHelper Exception. Adapted AbstractView & ViewInterface. Resolves #3303
- Added section parameter to `URIFor()` method of the URIBuilder
- Refactored Base controllers - `controllerContext` is no instance variable anymore and will be created when passed to view in `initializeView()`.

Resolves #3404

- ControllerContext is of scope prototype now. Added setter/getter for URIBuilder. Some cosmetic changes.
- Added `getRequestPath()` to Request.
- ControllerKeys (`@controller`, `@action`, `@package`, `@subpackage` and `@format`) can now be set by request arguments. Resolves #2853

History

#2 - 2009-05-22 15:35 - Bastian Waidelich

- Assigned To changed from Sebastian Kurfuerst to Bastian Waidelich

We decided to rename `setupControllerContext()` to `buildControllerContext()`. The instance variable `$controllerContext` will be removed from AbstractController.

#3 - 2009-05-23 18:22 - Bastian Waidelich

There is one question remaining: Should the URIHelper / URIBuilder get this whole object, or just the Request object?

The URIBuilder does not contain the controllerContext. The controllerContext contains an instance of URIBuilder.
