Sprint Focus:			
Subject:	Remove all references to forceCharset setting		
Description			
The forceCharset is deprecated since 4.5 and is to be removed in 4.7			
Remove all references to it. If behaviour is in question, change as it would have been set to 'utf-8' as it is like this since 4.5.

[CLEANUP][CONF!!!] Remove forceCharset option and references

In TYPO3 4.5 the forceCharset and setDBinit options have been deprecated. "forceCharset" was set to be removed in 4.7.

This ChangeSet removes the config option from the install tool and all references within core to this variable.

If behaviour had been in question, the code has been adapted to behave like the variable had been set to utf-8 and therefore like the behaviour had been since 4.5.

[BUGFIX] Failing charset related test in page renderer

With issue #34092 the charset conversion code was removed from the core. Test isInlineLanguageLabelDeliveredWithNonUTF8 fails now and can be removed as obsolete.

Revision 2332335a - 2013-06-23 11:42 - Christian Kuhn

[TASK] Remove last bits of forceCharset handling

Core version 4.5 introduced UTF8 only for charset conversion, and accepted a fallback under special circumstances. The fallback was removed with 4.7.
This setting is now finally fully removed from the configuration and not taken into account anymore.
