Subject:	setNewIndex() breaks when invalid position is given		
Description			
When an invalid position is given to setNewIndex(), the index of the target node is either set to NULL or the code will break due to the use of an uninitialized variable.

[BUGFIX] Make setNewIndex() throw exception on invalid position

When an invalid position was given to setNewIndex(), the index of the target node was either set to NULL or the code would break due to the use of an uninitialized variable.

This change makes the method throw an `InvalidArgumentException` in case an invalid position is given.

Change-Id: `Id35d0cf17f117441a1ac0444628ffa2e91784130`

Fixes: #34116
