Complexity:			
Affected Flow version: Git master			
Subject:	XLIFF models are created with wrong locale		
Description			
If a translation is requested but no (exact) match is found, a different locale may take effect (e.g. en instead of en_UK). The XLIFF model created will refer to the en XLIFF file, but claim it's locale is en_UK. This leads to further problems with translations (like missing labels if no target elements are present in XLIFF files).

[BUGFIX] Fixes wrong locale in XLIFF models

If a translation is requested but no (exact) match is found, a different locale may take effect (e.g. en instead of en_UK).

The XLIFF model created will refer to the en XLIFF file, but claim it's locale is en_UK. This leads to further problems with translations (like missing labels if no target elements are present in XLIFF files).

This change fixes that...
