Subject:	Move link.widget & uri.widget ViewHelpers to Widget subfolder		

Description

Widget related ViewHelpers should be in the Widget subfolder of Fluid (as in v4).
link.widget should be widget.link, uri.widget should be widget.uri.
Existing ViewHelper classes should extend the moved classes and marked deprecated.

[!!!][TASK] Move link.widget & uri.widget Widget subfolder

This moves widget related ViewHelpers link.widget & uri.widget
to the Widget subfolder (as in v4).

Instead of link.widget you should use widget.link, instead of
uri.widget widget.uri from now on.

This is not a breaking change right now as the old classes
are still there (with @deprecated annotation). But if you
used one of the ViewHelpers you should adjust your code.
