I would propose this change.

simplify the api by using \$customControlConfig directly as input for t3lib_div::callUserFunction(). a call would then look like

```
'customControls' => array(
    'fo' => 'EXT:news/Classes/Hooks/Test.php:Tx_News_Hooks_Test->user_fo',
),
```

instead of

```
'customControls' => array(
    'fo' => array(
        'userFunc' => 'EXT:news/Classes/Hooks/Test.php:Tx_News_Hooks_Test->user_fo'
    ),
),
```

you see this is much easier.

customControlConfig is IMO not needed inside the hook because \$config is added which includes the customcontrols too.

Good point, makes sense.
