

TYPO3.Fluid - Bug # 34324

Task # 11969 (Closed): Make widgets' template configurable

Status:	Closed	Priority:	Must have
Author:	Christian Müller	Category:	Widgets
Created:	2012-02-27	Assigned To:	Karsten Dambekalns
Updated:	2012-03-07	Due date:	
Has patch:	No		
Affected Flow version:	FLOW3 1.0.0		
Subject:	Template of widgets can't be changed		
Description			
<p>Currently the widgets use the default template path only and it is impossible to override those which is kind of a nogo.</p> <p>Attached patch fixes this. The path can be set via TS. e.g.</p> <pre>plugin.tx_fo.view.widgetRootPath = fileadmin/fo/</pre> <p>If using the pagination widget, the index.html needs to be at fileadmin/fo/ViewHelpers/Widget/Paginate/Index.html One open question: Is this the correct way to go with the part "ViewHelpers" inside this path? or should it be fileadmin/fo/Paginate/Index.html?</p>
