

TYPO3.Kickstart - Bug # 34467

Status:	Closed	Priority:	Should have
Author:	Matthias Witte	Category:	
Created:	2012-03-02	Assigned To:	Karsten Dambekalns
Updated:	2012-03-07	Due date:	
Affected Flow version: FLOW3 1.0.3			
Subject:	Less Backslashes in the Annotation		
Description			
<p>I've done the guide on http://flow3.typo3.org/documentation/guide/partii.html</p> <p>So i wanted to add a Comment model to enhance the blog.</p> <p>Ive used kickstarter to add a new model with this command:</p> <pre>./flow3 kickstart:model TYPO3.Blog Comment author:string text:string post:\TYPO3\Blog\Domain\Model\Post</pre> <p>The annotation for the get and set method gone wrong:</p> <pre>/** * Get the Comment's post * * @return \TYPO3\Blog\Domain\Model\TYPO3BlogDomainModelPost The Comment's post */ public function getPost() { return \$this->post; } /** * Sets this Comment's post * * @param \TYPO3\Blog\Domain\Model\TYPO3BlogDomainModelPost \$post The Comment's post * @return void */ public function setPost(\$post) { \$this->post = \$post; }</pre> <p>In my opinion there have to be more backslashes in dhe @param annotations.</p> <p>Hope someone will understand this :D</p>

You need to escape the backslashes in your shell - otherwise they do not even reach the PHP code...
