<b>Subject:</b>	Evil packed bz2 package		
<b>Description</b>			
<p>in the FLOW3-1.0.3.tar.bz2 file is a bad fileentry for ./ . if you untar this bz2 file as root, you change your directory owner and group for your current directory.</p> <p>That is very bad..... Here's the catch:

```
tar --transform="s,^./,FLOW3-1.1.0-beta2/, " --exclude=".git*" --exclude="Data/*" --exclude="Web/_Resources/*" --exclude="Build/Reports"
--exclude="./Cache" --exclude="Configuration/PackageStates.php" -czf ~/FLOW3-1.1.0-beta2.tar.gz --directory ~/Sites/flow3 .
```

is used to create the archives. But the transform regex works not on . thus that entry is left alone and ends up in the archive.
