Subject:	Fix/take care of license headers along all files		
Description			
Sometimes, you can read for example			
* This script belongs to the FLOW3 package "Comments". *			
while it should rather be ...package "TYPO3.Comments".			
So generally: it should be made sure that that header is corrected and included at all in every involved file.

[TASK] Adjusted license header in each file

The license header annotation was unequal across the different files; this patch fixes that.
