Subject:	generic "Comments" ViewHelper		
Description			
<p>I'm currently writing a generic Comments ViewHelper that'll have the following signature / functionality:</p> <pre>/** * Returns comments for an entity as collection in order to e.g. <f:for each=""> it * * = Examples = * * <f:for each="{c:comments(object: affectedObject)}" as="comment"> * <cite>{comment.author.name}</cite> * <blockquote>{comment.message}</blockquote> * </f:for> * */</pre> <p>(I personally will use that as a base for converting it to JSON; but the sampled use case is very... useful, I think).</p> <p>I'll keep it locally and make a Gerrit once the base code is in the master branch.</p>

[FEATURE] Generic "Comments" ViewHelper

This provides a ViewHelper that returns the Comments Collection attached to a given object in order to e.g. <for each=""> though it.

Change-Id: I4c6528d3cc060c6e21543adaeafc9535ad25fb2c

Resolves: #34630
