

## TYPO3.Fluid - Bug # 34682

<b>Status:</b>	Under Review	<b>Priority:</b>	Should have
<b>Author:</b>	Kira Backes	<b>Category:</b>	ViewHelpers
<b>Created:</b>	2012-03-09	<b>Assigned To:</b>	
<b>Updated:</b>	2013-11-20	<b>Due date:</b>	
<b>Has patch:</b>	No		
<b>Affected Flow version:</b>	Git master		
<b>Subject:</b>	Radio Button missing checked on validation error		
<b>Description</b>	The checked state of a radio button is not properly checked in the case of a validation error, this should be checked by comparing the value to the lastSubmittedFormData		

### History

#### #1 - 2012-03-09 13:37 - Bastian Waidelich

- Category set to ViewHelpers
- Status changed from New to Needs Feedback

Can you provide more details please (code snippet, version(s) used, ..). This should work.  
Is this maybe related to #33628 ?

Thanks

Perhaps it's the bug described in my blog post? <http://blog.layne-obsordia.de/post/fix-radio-and-checkbox-for-fluid#comment-795695300>  
There is a bug fix in the post.

Or is this another issue? I noticed that submitted checkboxes and radio buttons aren't selected anymore.

So e.g. the checkbox is not selected initial.

I check it, submit the form and the form will be displayed again, on validation error, then the checkbox is no more checked.

I just fixed it for the rewritten property mapper and got the submitted value and did a compare.

#### #3 - 2013-07-12 18:23 - Benno Weinzierl

This bug only happens for radio buttons with name="something" and not for radio buttons specified with property="something".

Looking at the code it seems almost like a intentional behaviour:

```
if ($checked === NULL && $this->isObjectAccessorMode()) {
    if ($this->hasMappingErrorOccured()) {
        $propertyValue = $this->getLastSubmittedFormData();
    } else {
        $propertyValue = $this->getPropertyValue();
    }
}
```

```
// no type-safe comparison by intention
$checked = $propertyValue == $valueAttribute;
}
```

`$this->isObjectAccessorMode()` is the problem...
