Subject:	Kickstarting a package should generate a layout with base viewhelper		
Description			

Without that any work based on the original template will not work out as you miss the base tag and it is in line with the kickstart:action command.

Revision 888a5cf3 - 2012-04-26 21:47 - Christian Müller

[FEATURE] Generate layout on kickstart:package

With this change the kickstart:package command generates a
layout from the same template as the kickstart:action command.
So resulting view has a base tag included which allows for
easier usage of the resulting StandardController.
