TYPO3.Flow - Bug # 3477

Status:	Resolved	**Priority:**	Must have
Author:	Robert Lemke	**Category:**	Persistence
Created:	2009-05-27	**Assigned To:**	Karsten Dambekalns
Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Objects added to a (persistence) repository don't have have a uuid

Description

Newly created objects which are added to a repository don't have a uuid before they are persisted:

```
/**
 * @param \F3\Releazr\Domain\Model\Release $newRelease
 * @return string
 */
public function createAction(\F3\Releazr\Domain\Model\Release $newRelease) {
    $this->releaseRepository->add($newRelease);
    $this->redirect('show', NULL, NULL, array('release' => $newRelease));
}
```

The redirect in the above example doesn't work because the URI needs to know the UUID of $newRelease which yet doesn't exist.

Solution: Let the (release) repository create a UUID and let the CR take that UUID as a hint for later persistence.

Associated revisions

Revision 734da3c3 - 2009-05-28 15:40 - Karsten Dambekalns

FLOW3:

 - entities now get an UUID set through AOP upon creation which is used later on, resolves #3477

TYPO3CR:

 - getUUIDByObject now looks for UUID set by FLOW3 through AOP, refs #3477
