TYPO3.Flow - Bug # 34837

Status:	Resolved	**Priority:**	Should have
Author:	Adrian Föder	**Category:**	Core
Created:	2012-03-14	**Assigned To:**	Christian Müller
Updated:	2012-03-23	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version:	Git master
Subject:	flow3:cache:flush should care about the .Shortcuts state

Description

Currently, after renaming a package path (name; from Foo to Acme.Foo) manually, flow3:cache:flush resulted in an error a class couldn't be found (naming the correct, new namespace).

So, for example, the old namespace was

    Foo\ViewHelpers\BarViewHelper

while the new one, after renaming, is

    Acme\Foo\ViewHelpers\BarViewHelper

(located in Packages/Application/Acme.Foo/Classes/....); and the corresponding error message was

    Class Acme\Foo\ViewHelpers\BarViewHelper could not be found

which means, he correctly looked for the new, actually intended one; but didn't have the file available.

The reason was that .Shortcuts didn't contain that (new) package path's representation.
IRC suggestion was to remove .Shortcuts completely, in order to get it rebuilt from scratch, when calling flow3:cache:flush.

Revision 6d13ef27 - 2012-03-23 12:08 - Christian Müller

[BUGFIX] Clear .Shortcuts on cache flush command

In case some directories were renamed you are able to get
back to a defined state with the cache:flush command.

It will also clean the .Shortcuts directory to prevent
mismatches.
