

TYPO3.Flow - Bug # 3488

Status:	Resolved	Priority:	Must have
Author:	Robert Lemke	Category:	MVC
Created:	2009-05-27	Assigned To:	
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Parameters of actions which have a name containing uppercase characters are not automatically registered		
Description			
<p>Automatic parameter registration works for the regular CRUD actions:</p> <pre>public function createAction(\$myParameter)</pre>			
<p>but doesn't work if there's an uppercase character in the action name:</p> <pre>public function createFooAction(\$myParameter) public function createMyBarAction(\$myParameter)</pre>			
<p>This is due to case conversion problems in the Action Controller and finally fails in this line:</p> <pre>protected function initializeActionMethodArguments() { \$methodParameters = \$this->reflectionService->getMethodParameters(get_class(\$this), \$this->actionMethodName);</pre>			
<p>because <code>\$this->actionName</code> contains for example "createmylbarAction"</p>
