PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version:	Git master
Subject:	Column type detection broken when Column annotation is used
Description	

If a Column annotation is used but no type argument is given, the default "string" type will be used and override the detection.

[BUGFIX] Fixes column type detection when using Column annotation

If a Column annotation is used but no type argument is given, the default
"string" type was used and did override the detection. Now the detection
is used again in those cases.

The only drawback is that you cannot force a column to be "string" any
more.
