TYPO3.Flow - Bug # 35035

Status:	Resolved	Priority:	Should have
Author:	Christopher Hlubek	Category:	Persistence
Created:	2012-03-20	Assigned To:	Karsten Dambekalns
Updated:	2012-07-18	Due date:	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version:	FLOW3 1.0.0
Subject:	Doctrine repository findAll is inconsistent

Description

The findAll method of the special doctrine repository (needed for custom DQL afaik) returns an array of objects (through parent::findAll). The default repository does return a QueryResult object which is needed for widgets etc. to work. Also the Doctrine Query itself does return a QueryResult in execute(). So the current behavior is inconsistent and can lead to bugs.

Revision 9825cdbf - 2012-07-10 12:10 - Karsten Dambekalns

[BUGFIX] Have Doctrine\Repository::findAll() return a QueryResult

This makes the behavior of Doctrine\Repository consistent and
allows the use of findAll() e.g. in combination with widgets.

With this change, findAll() also observes the default ordering
of a repository.
