<b>Has patch:</b>	No		
<b>Affected Flow version:</b>	Git master		
<b>Subject:</b>	TranslateViewHelper returns empty string if id is missing and view helper tag is empty		
<b>Description</b>	With an empty view helper tag (<f:translate id="some.message.id" />) and a missing id, the view helper just returns nothing instead of displaying the id. From what is specified for the i18n API, I would expect to get the ID.

[BUGFIX] Avoid empty output of TranslateViewHelper

If translation by ID is used but no translation is found, the ID will now be returned if the view helper tag has no content. Before this change it would just return nothing (printable, at least).
